

Model Aquatic Health Code Technical Committee

MAHC Module Submission Coversheet

Module Name: _____

When ready to submit the above module for review, please consider and complete the following for all recommendations set forth in the module

- What information forms the basis for the standards in this module?
- Do the standards incorporate sound science and engineering?
- Are the standards defensible? Explain the basis for your decision.
- Cite all references – technical information, research, journal articles, and other sources of information that validate the defensibility of the recommendations set forth in this module.

Submit other associated MAHC information

- Annex information detailing rationale for MAHC recommendations
- Glossary terms or edits of existing terms

In addition, please grade each section of the module according to the following categorization system

- A. Practice supported by science/research/data.
- B. Generally accepted practice not supported by science/research/data.
- C. No generally accepted practice; proposed language not yet supported by science/research/data.
